Subject: South Carolina 208 Water Quality Plan Feedback

Anne,

I reviewed the 208 Water Quality Plan on behalf of Chesterfield County Rural Water Company and the Town of Chesterfield. I have one suggestion or correction as we discussed on the telephone. In Table 2, the Town of Chesterfield wastewater plant is still listed along with its NPDES Permit number and discharge limit. The Town of Chesterfield did not renew its NPDES Permit in 2010 and the plant is no longer operational. In fact, the town is now in the process of decommissioning the plant and is cleaning/de-sludging the lagoons. The town's waste is now being pumped and treated at the Town of Cheraw WWTP (as stated elsewhere in the 208 report).

Please let me know if you have any questions or concerns with regard to this matter.

Thanks,

Charlie Gray
Chesterfield County Rural Water Co.
